

## YOU ARE INVITED

### DME: The question marks

**Saturday 18th June, 13:00 – 14:40 CEST**

**REGISTER HERE**

Join retina experts from around the world in this live virtual medical education event, as they present on important questions and considerations in the diagnosis and treatment of patients with diabetic macular edema.

## AGENDA

Time (CEST)	Session
13:00	Welcome address
13:05	How is DME diagnosis evolving? - Should FA still be routine? - What do we know about OCT-A and how can it help patient assessment?
13:20	OCT biomarkers: What inflammation-specific features should we look out for? - What is the evidence behind them? - What do they prove?
13:35	OCT: What long-term features are related to long-term outcomes? - Does the magnitude of edema, edema fluctuation and chronicity impact treatment outcomes?
13:50	Realities of SOC: Are all patients made equal? - How to incorporate learning into treatment decision-making?
14:05	What is the best approach for treatment follow-up? - What are the special considerations?
14:20	Round table discussion: What can we conclude today?
14:38	Closing remarks
